For Immediate Release

Lithium-Ion Battery-Powered Hydraulic Robo Crimper Performs Well in Winter Weather

Hi-Line Utility Supply Company is pleased to offer this 12-ton lithium-ion battery-powered hydraulic robo crimper tool. It is supported by a 5-year manufacturer warranty and accepts all 12-ton “U” dies.

The 14.4v lithium-ion battery lasts longer than previous battery designs. In addition, the tool features a mechanical retract - no battery power is necessary for this function - which greatly extends battery life.

REC-5510AT

This crimper has been redesigned with a new ergonomically balanced heavy duty housing: it performs even in bad weather. The protective rubber boot on the “C” head also offers protection.

The new lithium-ion battery charger will also charge older battery models Ni-Cd and Ni-Mh.

Most older tools will accommodate the new lithium-ion battery system in replace of the older Ni-Cd and Ni-Mh system. Ask a Hi-Line customer service representative for more information.

Call a Hi-Line customer service representative today to get more information on this and many other winter tools at 800-323-6606. Also visit us online at www.hilineco.com.

For a limited time, Hi-Line is also offering a free mini-ditty bag with each order.
