Hi-Line Utility Supply's Pole Transport Markers Keep Your Vehicle Visible, Safe, and In Compliance

Hi-Line's **Pole Transport Marker** provides increased visibility for the transportation of utility poles on public highways and will help keep you in compliance with Department of Transportation regulations.

The product consists of two flags combined with a tamper resistant warning light, which is available with either amber or red lenses, and features two modes, steady-on or flashmode. The light provides optimum visibility of up to 1000 feet in daylight. The marker is secured to the pole with a ratchet strap binder. Steel grips along the base of the platform dig into the utility pole to prevent slippage. Reflectors along the flag holders provide additional visibility.

The Pole Transport Marker is lightweight, highly visible, rugged, safe, cost effective, and energy efficient. The Pole Transport Marker meets regulations for most Departments of Transportation. Please contact the DOT along your route for local regulations.

Call a Hi-Line customer service representative today to get more information on this and many other safety products, including tools that make working in winter safer and easier at 800-323-6606.

You can also visit Hi-Line Utility Supply Co. online at www.hilineco.com.
